

MOTION BY MAYOR MICHAEL D. ANTONOVICH

JUNE 2, 2015

The Los Angeles County Waterworks Districts are legally and financially independent districts that are administered by the Board of Supervisors as the Board of Directors. The Board should explore appointing a commission of local representatives for each district to administer some aspects of the districts, including issues like the phased water conservation plan and fee increases. An appointed commission of local representatives will provide some local control and make it easier for staff to respond to and interact with the communities. This commission would be accountable to the Board of Supervisors and the Board would ultimately serve as the deciding body.

**I, THEREFORE, MOVE** that the Board of Supervisors direct County Counsel in conjunction with Public Works to report back in 30 days with options on creating a separate commission of appointed local representatives to administer some aspects of the Waterworks Districts.
